

# ***The Alaska Legislature is considering allowing your local phone company to raise your rates***

Under HB 111, as amended, local telephone companies will have the right to:

- raise local telephone rates up to \$100 million statewide

Additionally, with no review whatsoever, local telephone companies can:

- eliminate local phone competition completely or force competitors to raise rates.

In many cases HB 111, as amended, will allow your telephone company to:

- refuse to provide service
- cause rates in rural Alaska to skyrocket
- deny regulatory agency review of rates

Bottom line: If this bill passes as amended,  
***your phone rates will go up!***

**Write or call your legislator today and let him or her know that you oppose  
any bill that results in rate increases.**
